

<b>Project Name:</b>	Inventory Management System (IMS)
<b>Project Owner:</b>	Celina Basa

<b>Risk No.</b>	<b>Date</b>	<b>Description</b>	<b>Consequences</b>	<b>Risk</b>	<b>Mitigations/Response</b>
1	05/01/2021	Laptop falls off table	Laptop breaks and unable to access project files.		Regularly push updates to GitHub and/or save extra backup on USB.
2	05/01/2021	Catch COVID-19 virus	Become sick and unable to complete tasks within time restrictions.		Stay at home and wash hands regularly. In the case of catching the virus, inform trainers ASAP to negotiate project deadline.
3	05/01/2021	Electricity becomes unavailable	Not able to charge laptop and work on project.		Plan ahead for expected electricity outages. For unexpected outages, inform trainers if it is expected to last longer than a couple of days. Consider doing work at someone else's house (take into account lockdown restrictions).
4	05/01/2021	Drink spills on laptop	Laptop is unable to turn on therefore unable to access project files.		Keep drinks far away from laptop when in use. Push work to GitHub regularly to access project files from different device.
5	11/01/2021	Code does not run due to errors	Unable to meet project specifications and complete tasks dependent on that part of the code.		Fix code by revising material on QA Community, searching error message on Google, or asking trainers for help.

**Risk Matrix:**

		Impact				
		Negligible	Low	Moderate	High	Very High
Likelihood	Rare					
	Not Likely					
	Possible					
	Likely					
	Certain
